

PARTNERS & ACCREDITATIONS

Cybertrol continues to achieve and maintain certifications and partnerships with industry-leading products and organizations. We also maintain strategic memberships with some of the world's most trusted professional associations.

PLANTWIDE AUTOMATION & INFORMATION SOLUTIONS

END²END INTEGRATION

Working as a trusted partner to leading U.S. cheese producers for more than 27 years, Cybertrol Engineering is a system integrator with extensive experience in sanitary process control for the cheese and dairy industry. From the tanker delivery of milk through final cheese packaging and inventory management, we know your pain points. With best practices learned from hundreds of successfully completed projects throughout the industry, we understand your needs, your processes, and your operational challenges.

In my opinion, Cybertrol has a unique niche in the dairy and cheese industry. They know the basic production processes, which really helps expedite the system integration process, since you don't have to educate them on the general production processes.

- Senior principal engineer at a large Wisconsin cheese manufacturer

Our dedicated cheese and dairy team understands the industry, and its unique process requirements. We know that every day, tankers of fresh milk arrive and must be processed. Downtime is not an option, and PMO compliance is a must.

Our engineers have created control solutions tailored to your highly specialized needs, ensuring raw milk is processed efficiently and with the highest quality standards, while gathering the correct data to create the reports you require.

Cybertrol's PMO-compliant solutions can effectively control your processes from raw dairy receiving and storage to standardization and pasteurization. Our proven methodology using recipe management for cheesemaking or dairy mixtures ensures product is in-spec and USDA compliant. We've also developed a custom solution for cleaning (CIP) processes that is flexible, efficient, and collects data required by the FDA, without the need for chart recorders.

PROCESS EXPERTISE

- Raw Milk Intake/Storage
- Milk Standardization
- Pasteurization (HTST)
- Homogenization
- Separation
- Vat Automation
- Drying/Evaporation
- Configurable CIP & SIP
- Product Packaging

OVERALL CAPABILITIES

- PLC/HMI Programming
- Materials Track & Trace
- Production Reporting
- Custom Dashboards
- Controls Modernization
- Network Support/Security
- Performance Metrics
- Packaging Line Integration
- 24/7 Customer Support
