# Manufacturing Intelligence

Effective manufacturing intelligence allows for comprehensive operational analysis.

Cybertrol experts provide information systems at each site and aggregate data for enterprise dashboards. We implement manufacturing intelligence strategies that leverage tools and interfaces plantwide, allowing for effective streamlined processes.

From historian systems and reporting solutions to mobile solutions and data collection, we provide 24/7 support and a cohesive partnership approach. Our operational intelligence solutions include:

- Performance-OEE
- Production Management
- Batch Management
- ERP Integration
- Traceability and Genealogy
- Quality & SPC
- Recipe Management
- Materials Management
- Workflow Management
- Reporting & Dashboards

# Automation

**Plantwide automation is the future of manufacturing.**

And partnering with Cybertrol means that future has never been brighter. From raw material receiving to processing and packaging, our team of experts handles projects in-house from start to finish to ensure a cohesive, winning outcome.

Our automation solutions are built to help a plant adapt and evolve well beyond the initial installation process. Learn more about how our experts can help with:

- Project Engineering & Consulting
- PLC & HMI Solutions
- Migrations & Upgrades
- Packaging Line Integration
- Batch Control
- OEM Equipment & Machines

# Industrial Information Technology

**Seamless integration within the industrial marketplace is critical.**

Plant network infrastructures and business infrastructures need to function together, communicating efficiently to allow for immediate access to the same information. Cybertrol experts are committed to delivering that convergence with secure and reliable industrial IT/OT solutions. Trust our team to help with:

**Industrial Data Centers** – leverage turnkey data center solutions for the highest level of availability and redundancy to eliminate potentially catastrophic downtime.

**Networks** – transform any facility into a cutting-edge space with comprehensive network services including site assessments, upgrade planning, design, and much more.

**Cybersecurity** – prevent unauthorized network access ensuring long-term success with our role-based security solutions.

**Managed Services** – keep operations up and running with access to monthly reports on system health, pinpoint incident reports, remote monitoring and management, automated system backups, and 24/7 comprehensive support.

# A Legacy of Engineering Excellence.

## **Results matter.**

It's why hundreds of clients from around the world entrust Cybertrol to handle all their automation, information, and industrial IT/OT needs. And it's why we've been chosen to lead more than 3,000 projects across more than 450 diverse plant environments, all since 1996.

We know plantwide integration can be a massive undertaking.

At Cybertrol, we pledge to make the process both smooth and successful. Problem-solvers at heart, our elite core of engineers hold themselves to a higher standard than the rest of the industry — because that's what every operation deserves.

# Support

## 24/7/365 Support Department

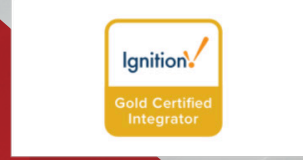

- Dedicated support team of career engineers
- Automation controls, server, and networking support
- Remote support available by phone and email
- VPN Connectivity for remote support and on-site services as necessary

## Support Contract

- Managed Service Provider for server and software systems
- Periodic system health reports
- Continuous, live monitoring of server and network infrastructure
- Patches and security updates

# Partners & Accreditations

Cybertrol Engineering continues to achieve and maintain certifications and partnerships with industry-leading products and organizations. We also maintain strategic memberships with some of the world's most trusted professional organizations.
